

ALEXANDER RANKOV

SOFTWARE ENGINEERING STUDENT

514-746-9895

Vaudreuil-Dorion, Quebec, J7V 9B9

alexander.rankov.1@ens.etsmtl.ca

French (Fluent)
English (Fluent)
Bulgarian (Fluent)

[LinkedIn](#) | [Portfolio](#)

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

C# (Unity), CSS3, GDScript, HTML5,
Java, JavaScript, SASS

FRAMEWORKS AND LIBRARIES

React

GAME ENGINES

Unity, Unreal Engine, Godot

CODE EDITORS

Eclipse, IntelliJ, Visual Studio, Visual
Studio Code, WordPress

3D AND MULTIMEDIA

Blender, Maya, Adobe After Effects,
Adobe Illustrator, Adobe Photoshop,
Adobe Premiere Pro, Adobe XD,
Affinity Designer, Substance Painter,
Wix

EDUCATION

Bachelor's in Software Engineering École de Technologie Supérieure (ÉTS), Montreal	2025 - Current
Diploma of College Studies in Multimedia Integration Collège de Maisonneuve, Montreal	2022 - 2025

AWARDS AND SCHOLARSHIP

NSERC Undergraduate student research award (USRA), 2026 Awarded for a research internship in 3D geovisualization and UX at ÉTS.

PROFESSIONAL EXPERIENCE

Research assistant in 3D Cadastral, UX Design and 3D Geovisualization École de technologie supérieure (ÉTS), Montreal	May 2026 – August 2026 (Internship)
---	---

- Developing multiple 3D visualization approaches for cadastral data using Unity.
- Designing and implementing interactive scenes showcasing different rendering techniques for the same building model.
- Conducting user-centered research to evaluate the impact of visualization methods on user trust and perception.

Video Editor Hockey Québec, Montreal	March 2025 – May 2025 (Internship)
--	--

- Developing multiple 3D visualization approaches for cadastral data using Unity.
- Designing and implementing interactive scenes showcasing different rendering techniques for the same building model.
- Conducting user-centered research to evaluate the impact of visualization methods on user trust and perception.

PERSONAL PROJECTS

Java Calculator	January 2026
------------------------	---------------------

- Designing a Java command-line calculator, applying clean code principles and input validation to ensure reliable numerical computations.
- Building support for multiple arithmetic operations using modular methods and clear separation of logic, improving readability and maintainability.
- Gaining hands-on experience with Java fundamentals including arrays, type casting, exception handling and command-line arguments.

Escape the Labyrinth	March 2025
-----------------------------	-------------------

- Designing a Java command-line calculator, applying clean code principles and input validation to ensure reliable numerical computations.
- Building support for multiple arithmetic operations using modular methods and clear separation of logic, improving readability and maintainability.
- Gaining hands-on experience with Java fundamentals including arrays, type casting, exception handling and command-line arguments.

To-Do List	June 2024
-------------------	------------------

- Developing a web application featuring a to-do list for the user as part of a React learning project.
- Applying concepts of components and states to manage dynamic rendering.
- Deepening understanding of modern front-end programming fundamentals using JavaScript and React.

WORK EXPERIENCE

Bagger Metro Inc., Vaudreuil-Dorion	July 2024 - June 2026
---	------------------------------
